

Public Notice: Boil Water Advisory Rope Subdivision

Date: October 29, 2021

Time: 1:55 p.m.

BOIL WATER ADVISORY

Properties connected to the Rope Area Drinking Water System, in the Rope Subdivision.

For Municipal Water Users Only

Area Affected: 40 properties in the Rope Subdivision

Tay Township, in consultation with the Simcoe Muskoka District Health Unit (SMDHU), has issued a boil water advisory as a precaution due to a loss of water pressure and pump failure, that occurred while seasonal flushing of the Rope water distribution system was being conducted. It is expected that water pressure will be restored before 5:00 p.m. today.

This is a precautionary measure to ensure public safety. Notices have been hand delivered to all affected properties.

The advisory will remain in effect until water sample laboratory results indicate that there are no further concerns. When the advisory has been lifted, residents will be notified by hand-delivered notices.

What to do:

Tay Township advises that all water used for consumption be **heated to a rolling boil for at least 1 minute** prior to use (store in a clean covered container). Unless it has been boiled first or is commercially bottled, water should not be used for drinking, baby formula, juice, ice, washing fruit and vegetables or brushing your teeth. Please note: Home filtration devices are not a substitute for boiling water.
